

IP-Phone OpenPhone 75 IP

Voice-over-IP workplace solution for OpenCom 100,
OpenCom 1000 and OpenCom X320

Maximum comfort in IP net

The comfort phone OpenPhone 75 IP is a system phone for Voice-over-IP on OpenCom 100, OpenCom 1000 and OpenCom X320 over the standard Internet Protocol (IP). The OpenPhone 75 IP offers almost the same functions and comfort as the conventional system phone OpenPhone 75. The difference is the behaviour in the network: The IP phone log on independently over the standard interface in the company network (LAN) and on demand it can be used without own power feeding. Additionally, a PC can be connected on the switch at the OpenPhone 75 IP, so that only one LAN port is needed at the workplace.
